

Front Coil Springs : DuraTPE® Pro Series Size A **Ground Lifting Height : 1"**

Rear Coil Springs : DuraTPE® Series Size D **Ground Lifting Height : 0.45"**

- Front : the coil springs are distribute not evenly. The space between coil is big on the bottom and getting smaller when you reach top. We install the CSBPro-A for the best performance. It fit perfectly and lift the SUV for 1 inch on the front.
- Rear: rear coil springs are quite uniform and only can fit size D (no CSBPro can use) We use CSB-D-R to install the rear and the rear lift around 0.45"
